PATENT

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

Applicant: Suzanne V Klimberg et al.

Examiner: Kevin Weddington

Serial No.: 10/633,402

Group Art Unit: 1614

Filed: August 1, 2003

Docket: 781.020US1

Title: IMPROVED TREATMENT OF CANCER WITH GLUTAMINE

**RESPONSE TO RESTRICTION REQUIREMENT**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

This is in response to the Restriction Requirement mailed August 31, 2004.

In the Restriction Requirement, the Examiner required that Applicants elect one of the following inventions:

Group I, Claims 6-14 and 44-58 are drawn to a method of protecting non-mucosal tissue against damage from radiation therapy with glutamine, classified in class 514, subclass 563.

Group II, Claims 19-26 and 44-58 drawn to a method of reducing or preventing pain arising from a non-mucosal tissue with the administration of glutamine, classified in class 514, subclass 563.

Applicants provisionally elect with traverse the claims of Group I, claims 6-14 and 44-58 drawn to a method of protecting non-mucosal tissue for radiation damage.

The Restriction Requirement is traversed on the basis that certain of the claims subject to restriction are so closely related with the context of the disclosure of the application that they are not properly considered independent and distinct within the statutory meaning of 35 U.S.C. §121.

More specifically, the Examiner is requested to note that both groups of claims are classified in Class 514, subclass 563. While the claims are not of identical scope, a search of Group I will necessarily locate the art relevant to Group II, and vice-versa. Therefore, since restriction requirements are optional and such a search would not place any extra or undue burden on the Examiner, withdrawal of the restriction requirement is respectfully requested.
